

Lisa Blevins
Program Manager – Training and Outreach

Lisa is married to Stephen Blevins, a LT Engineering Duty Officer in the Navy. They were married in 2004 and have been stationed at Ingleside, TX, the Naval Postgraduate School in Monterey, CA and Mayport Naval Station in Jacksonville, FL.

Lisa attended Clemson University in upstate SC and earned a Bachelor of Science in Civil Engineering. She continued her education at Clemson to earn a Master's Degree in Civil Engineering Project Management. Lisa worked for a bioengineering company during graduate school helping to develop medical devices for cancer treatment. Every day was a new challenge, and every day she knew she was making a difference.

Recently she has worked for the same company again as a consultant developing marketing specifications, design control templates, and a curriculum guide for Clemson University. She loves to travel which is a good fit for the military lifestyle. She spent a year living and working in France and a summer in Russia during college. She loved the challenge of learning new languages and adapting to new cultures.

After college she went to work for a local construction company as a project engineer. Working there was a great experience because the company was extremely involved in the community and with local charities. She also worked as a project manager managing large construction projects in Monterey, CA.

Before being hired with MSCCN, Lisa was a volunteer at the NS Mayport Fleet and Family Support Center. She has enjoyed translating that experience into her position at MSCCN helping military families with their job search.

In 2010 Lisa has been responsible for the launch of the MSCCN MilSpouse Job Club in Florida and managing the national expansion of this program. She is also the program manager and content developer for our popular new virtual training program. She and our team of trainers have developed this into a successful interactive program that has helped our military families with topics from job fairs to resumes and networking.

Lisa has also developed several training programs and workshops that she had conducted in the Jacksonville, FL area. She is the National Grants Team Lead and has spearheaded the management of our outreach program supported by the BrAlve grant in Florida. These efforts have led to an increase in new applicants and hires, as well as an increase in the visibility of MSCCN programs and services in Florida.
