

## Jennifer Quimby Attends Kenexa Workbench Certification Training

During the period of November 14 through 17, 2011, Jennifer Quimby, MSCCN's Webmaster and Chief of Staff, attended Kenexa's *2x BrassRing (2xB)* Workbench Admin Training course at Kenexa's facility in Waltham, MA. As stated in Kenexa's training materials, the three-day course is designed to "provide the knowledge to become a certified Administrator of Kenexa's *Kenexa 2x BrassRing (2xB)* and Gateways through the use of Workbench, the *2xB* configuration tool. A Workbench administrator thoroughly understands the functionality and capabilities of *2xB* and is prepared to make configuration changes that impact *2xB* users as well as candidate applying through Gateways."

After returning from Waltham, Jennifer successfully completed and passed the Workbench Certification exam which not only provides her with access to the powerful capabilities of Workbench and *2xB*, but to all future training and upgrades to the system.

"I am very grateful to Kenexa for their generous donation of this training and for making it possible for me to gain the knowledge needed to obtain this valuable certification;" said Jennifer, "I can't wait to put it all into practical use!"
